*Dear Business Owner,*

I don't know many people who *love* bookkeeping.

Not even accountants and they do it for a living!

I am not like other accountants.

I enjoy working with Small Business Owners and the best way to help their business grow is to know their numbers. Remember the business adage, what you measure, you manage, and what you manage, you improve.

I also noticed that most small business owners were using QuickBooks® software. Piece of cake, I could learn this software in minutes I thought to myself.

Of course, it wasn't exactly the piece of cake I had envisioned it to be.

**QuickBooks® cost me many a sleepless night. I mean yes you get a manual and all that but it just seems to complicate things even more, don't you think?**

I was making mistakes **everywhere** and they were costing me **money**.

I'd had *enough*.

There had to be another way.

So I delved into the world of QuickBooks® and didn't allow myself to resurface until I'd figured it all out.

And that was a **humungous** job!

But, after a good year or so, I cracked it.

Now I'm one of a rare breed who actually *enjoys* bookkeeping!

But I still wasn't happy because I knew there were millions of people out there, **people just like you and me**, who were still struggling to keep up with their accounts.

So what I've decided to do is help out a little.

Share my in-depth knowledge of the inner workings of QuickBooks®, which I have gathered since I started working with the program in 1999, with the people who need it most.

People like you.

And is just what I did. I began to teach QuickBooks® seminars here in Tallahassee. After helping hundreds of students learn locally, I want to help people everywhere but never had the opportunity to do so. Now with the power of the internet, I can help small business owners far and wide learn about QuickBooks®.

And that's why I'm writing this letter to you.

I'd like to introduce you to possibly the best QuickBooks® training course that's ever been designed.
